1. SOLUTION SUMMARY

This solution is a document management process. The SharePoint site uses document libraries, site content types with Microsoft Word document templates, and Power Automate workflow.

Documents are created and worked on in the Draft Document Library. They are based on a series of predefined Document Templates stored in a Templates document library. For this project, we rebuilt four of these document templates, each with its own set of site columns and content types, in SharePoint. These templates are used across the Draft Document Library, the Published Document Library, and the Archived Document Library.

The process begins with document creation in the Draft Document Library. Once the user is ready, they trigger a Power Automate workflow, initiating the approval process. Upon approval, a PDF version of the document is generated in the Published Document Library.

If a document requires republishing, such as when a Policy is updated, the existing Published PDF is checked by the workflow, moved to the Archived Document Library, and a new PDF version is created from the updated Draft version in the Published Document Library.

The approval process is managed by Power Automate workflows. The process can be administered from the SharePoint List: Task Tracker.

Technology used:

- SharePoint
- Power Automate
- MS Word

The new Site Content Types:

- Policy
- Standard
- Standard Operating Procedure
- Management Procedure

2. SOLUTION ARCHITECTURE

The content is on SharePoint and the Workflows are built with Power Automate.

2.1. SHAREPOINT

SharePoint site: https://mintekcoza.sharepoint.com/sites/divisions/Docs

3. DOCUMENT LIBRARIES

3.1. DRAFT DOCUMENTS

URL: https://mintekcoza.sharepoint.com/sites/divisions/Docs/Documents Under Review

The SharePoint document library is the central repository where the process starts. Users create their drafts here and, once complete, use a Power Automate workflow for approval.

The new content types are:

- Policy
- Standard
- Standard Operating Procedure
- Management Procedure

For reference these are the old Content Types. Nothing was done to these for this project.

- POL
- MAP
- SOP
- STD
- APP
- AUT
- FRM
- JDD
- MET
- MSDS
- COMSTA

3.2. PUBLISHED DOCUMENTS

URL: https://mintekcoza.sharepoint.com/sites/divisions/Docs/PublishedDocuments

This document library contains all finalized documents that have gone through the approval workflows. A PDF of the approval document is stored here for reference.

This Document Library has the same Content Types are the Draft Document Library.

3.3. ARCHIVED DOCUMENTS

URL: https://mintekcoza.sharepoint.com/sites/divisions/Docs/ArchivedDocuments

When a published document is updated, the older version is stored in this archive. This ensures that all previous versions are accessible for reference and compliance.

This Document Library has the same Content Types are the Draft Document Library.

3.4. DOCUMENT TEMPLATES

URL: https://mintekcoza.sharepoint.com/sites/divisions/Docs/DocumentTemplates

This is where the MS document templates can be found. They are connected to the Site Content Types and come with default setting.

This Document Library has the same Content Types are the Draft Document Library.

4. LIST

4.1. TASK TRACKER

URL: https://mintekcoza.sharepoint.com/sites/divisions/Docs/Lists/TaskTracker

This SharePoint list tracks all the workflow processes and their approvals across the site, providing a comprehensive overview of task progress and completion.

6. DOCUMENT TEMPLATES

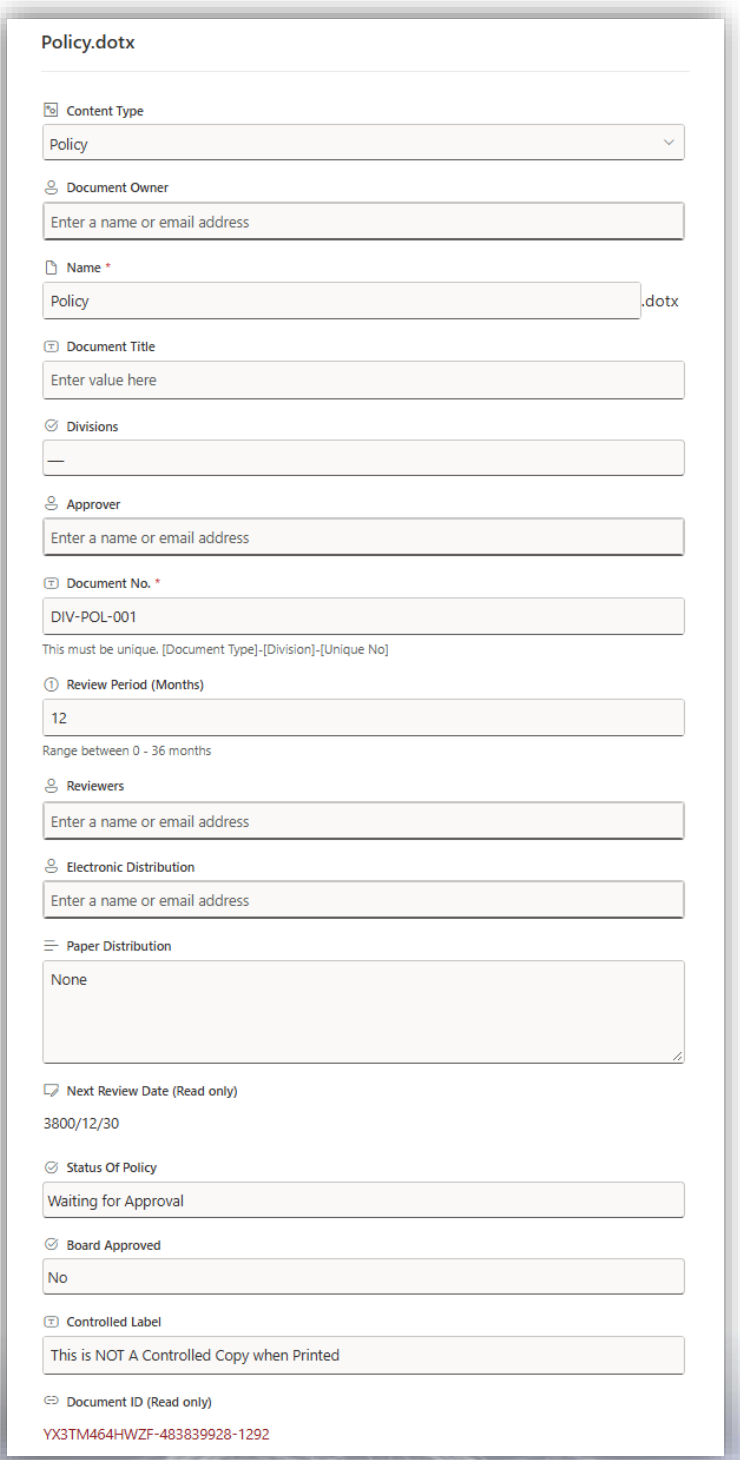

All the document templates are from their legacy predecessors, previously set up by Mintek. For the Policy Document Template, the old POL document template was used, and then, as per the Content Type fields updates and enhancement, the connected fields on the MS Word Templates were updated. Same for “Standard” from STD, “Standard Operating Procedure” from SOP, and “Management Procedure” from MAP.

All the Document Templates are stored in the Document Templates Document Library.

The screenshots below do not show the full document template, but they do show the document mapping.

5.4.1 Measure the outside dimensions of the product carefully.

7. WORKFLOWS

Power Automate Solution is called: Document Management.

7.1. DOCS - TASK TRACKER - NEW APPROVAL REQUEST

Workflow Process:

1. The workflow is trigger when a new item is created in the “Task Tracker” SharePoint List.
2. It sends out an Approval Request to the “Assigned to” person.
3. It waits for the response from the Approval Request before continuing.
4. It then checks that it wasn’t cancelled before continuing.
    a. If Not Cancelled, it then updates the “Progress” based on the Approval Request response. Either, approved or rejected.
    b. This is updated on the “Task Tracker” list

7.2. DOCS - TASK TRACKER - RESPONSE WHEN COMPLETED

Workflow Process:

1. The workflow is trigger when an item is modified in the “Task Tracker” SharePoint List.
    a. With a conditional trigger:
        i. Completed = false
        ii. Progress <> In progress
        iii. Progress <> Cancelled
2. If the “Progress” is Approved, then it creates the PDF version of the document.
3. It adds all the additional information to the related fields for the document.
4. Adds the PDF version into the Published Document library and then adds all the properties.
5. It then updates the Status’s on the “Task Tracker” list and the “Draft Documents” document library.
6. Then sends out an email notification to specify the document has now been published.

7.3. DOCS - DRAFT DOCUMENT - REQUEST APPROVAL FOR THIS SELECTED FILE

Workflow Process:

1. The workflow is trigger manually from the document you want the information from.
    a. This is from the “Draft Document” document library.
2. It gets all the information related to the trigger document.
3. It checks the document isn’t still open, which cause other issues.
4. It creates an Approval item in the “Task Tracker” list, and updates the documents properties.

7.4. DOCS - DRAFT DOCUMENT - REQUEST REVIEW FOR THIS SELECTED FILE

Workflow Process:

1. The workflow is trigger manually from the document you want the information from.
    a. This is from the “Draft Document” document library.
2. It gets all the information related to the trigger document.
3. It checks there are “Reviewer” filled in.
    a. Then does the respective notification
4. If there are Reviewers, it sends them an Approval Request
    a. These responses sends to the document owner.

7.5. DOCS - DRAFT DOCUMENT - CANCEL APPROVAL FOR THIS SELECTED FILE

Workflow Process:

1. The workflow is trigger manually from the document you want the information from.
    a. This is from the “Draft Document” document library.
2. It gets all the information related to the trigger document.
3. It Cancels the Progress on the “Task Tracker” list
4. Sends a Email notification to the related persons to let them know.

7.6. DOCS - DRAFT DOCUMENT - ARCHIVE THIS SELECTED FILE

Workflow Process:

1. The workflow is trigger manually from the document you want the information from.
    a. This is from the “Draft Document” document library.
2. It gets all the information related to the trigger document.
3. Moves the Document to the “Achieved Documents” Document library.
